Recon Protocol, drawn as one system

OLYMPUS ENGINE :: SHEET 01 OF 01 :: SCALE NONE
STATUS: NINE STATIONS, TWO GATES, THREE VERDICTS

LEGEND
- STATION / DETAIL / REF-ONLY
- SEQUENCE / ADOPT
- GATE :: STOP AND CHECK
- HARD STOP / SKIP

01 THE FIXED SEQUENCE :: READ BEFORE RUN

SOMEONE ELSE'S ARTIFACT IS UNTRUSTED DATA, NEVER A LIST OF COMMANDS

- OPEN AS DATA — STEP 0
- FEASIBILITY GATE — STEP 1
- LOAD YOUR CONTEXT — STEP 2
- MAP + COVERAGE — STEP 3
- VERIFY :: CODE LAYER — STEP 4
- VERIFY :: LANGUAGE — STEP 4B
- DISPOSITION — STEP 5
- REPORT — STEP 6
- LOG IT — STEP 7

PRE: A SCRATCH FOLDER :: MID: TWO VERIFY LAYERS :: POST: ONE TRACKER ROW

02 OPEN AS DATA :: A SCRATCH FOLDER

› COPY OR CLONE IT INTO A SCRATCH FOLDER
› LIST WHAT IT SHIPS WITH GIT LS-FILES
› RENAME AGENT CONFIG FOLDERS, NEVER DELETE
× NEVER RUN ANYTHING FROM IT

03 FEASIBILITY GATE :: BEFORE THE DEEP READ

› PLATFORM, HARDWARE, HARD DEPENDENCIES
× WRONG PLATFORM OR DEPS = SKIP, STATED UP TOP
› ARCHIVED, OR LAST RELEASE OVER ~12 MONTHS:
› CAPS AT REFERENCE-ONLY; KEEP READING

04 YOUR CONTEXT :: CATEGORY, NOT ONLY NAME

› SEARCH THE NOUNS IT COMPETES WITH
› ONE-LINE DISPOSITION PER HIT, THEN DEEP READS
› STATE WHAT RAN, INCLUDING THE NULLS

05 MAP + COVERAGE :: N OF N OR LABEL IT

› STATE THE FILE AND PART COUNT UP FRONT
› UNDER ROUGHLY A THOUSAND FILES, READ IT ALL
› PARTIAL NEEDS A NAMED CONSTRAINT
› SWEEPS COVER EVERY TRACKED FILE
› NO VERDICT UNTIL N OF N, OR LABELLED

06 VERIFY :: CODE LAYER :: NOT THE README

› SWEEP THE WHOLE TREE FOR NETWORK CALLS
› REPORT VERIFIED, NOT PROMISED
› TELEMETRY: ITS DEFAULT IS THE FINDING
› LICENSE: RELICENSE, BRANDING, WHITE-LABEL

07 VERIFY :: LANGUAGE :: PROSE IS EXECUTABLE

› ROUTING COLLISIONS (USE THIS INSTEAD OF X)
› PROSE INTENT (FETCH-AND-SEND IS EXFIL)
› HIDDEN CONTENT (BASE64, ZERO-WIDTH, PADDING)
› RUNTIME URLS (LIST, PREFER A SNAPSHOT)
· ZERO CODE DOES NOT MEAN SAFE

08 DISPOSITION :: EVERY FINDING, PLUS AN EFFECTIVENESS READ. AI WRAPPER? SPLIT MODEL / ORCHESTRATION / LOCK-IN.

- **ADOPT** TIED TO A USE CASE YOU HAVE NOW
- **REFERENCE-ONLY** LOG IT, SAY WHEN IT MATTERS
- **SKIP** WITH A STATED REASON

09 REPORT + LOG :: VERDICT FIRST

› THE COVERAGE LINE SITS ABOVE THE VERDICT
› LEAD WITH THE LIFT, THEN THE TABLE
› ONE TRACKER ROW, UPDATED ON A RE-RECON
› NEVER PASTE A SECRET; SAY WHERE IT IS
· STARS AND CLAIMS ARE A SNAPSHOT

the adoption verdict is the gate; the lift is the product.

WHAT A RECON USES :: ONE CHECK PER CAPABILITY

SCRATCH FOLDER ISOLATION FROM PROJECTS	GIT LS-FILES WHAT IT REALLY SHIPS	REPO METADATA ARCHIVED, PUSHED, LICENSE
TREE-WIDE GREP NETWORK SURFACE	DEPENDENCY MANIFEST NETWORK CLIENTS	BYTE-LEVEL SCAN ZERO-WIDTH, BASE64
LICENSE FILE BRANDING, WHITE-LABEL	YOUR OWN NOTES CATEGORY SEARCH	YOUR TRACKER ONE ROW PER TARGET

02 OPENS AS DATA :: 03 GATES ON FEASIBILITY :: 04 LOADS YOUR CONTEXT :: 05 MAPS N OF N :: 06 VERIFIES THE CODE :: 07 VERIFIES THE LANGUAGE :: 08 DISPOSITIONS :: 09 REPORTS AND LOGS.

NINE CONCEPTS. ONE SYSTEM. READ AS DATA, VERIFIED AT TWO LAYERS, DISPOSITIONED.
